

Ceiling unit cooler

MH/MHE commercial range

- The 24 models in the MH range meet the requirements of small storage cold rooms.
- Sturdy casing made of sheet steel with a low depth (228 to 260 mm) enabling optimum use of space in the cold room.
- Excellent air throw up to 17 m.

Heatcraft reserves itself the right to make changes at any time without preliminary notice - Photos non-contractual

Natural fluids:
Glycol water
CO₂ (R744)*

* Chill applications - Operating pressure 60 bar

1500  7700 W

HK[®] REFRIGERATION

MH / MHE - Commercial ceiling unit cooler

Market segments

FFS Bars - Restaurants - Corner shops - Mini-markets
FSM Hard Discount - Supermarkets - Hypermarkets

Description

Casing

- Sturdy and sober casing made of white pre-painted sheet steel.
- Its low depth enables optimum use of storage space in the cold room.

Ventilation

- The MH range is fitted with factory wired axial fans: Ø 300 mm: 230V 50-60 Hz, single-phase, IP42, class B.
- The fan guards are compliant with safety standards (photo n°1).
- 2 to 4 fans are necessary to cover the requirements of the entire range of capacities.

Coil

- The highly efficient and compact MH range finned coils are designed with corrugated aluminium fins (fin spacing 4.23 or 6.35 mm) and internally grooved copper tubes.
- The coils are supplied via a Venturi distributor.

Defrost

- Shielded electric heating elements are inserted in slots both on the front and rear coil faces.
- One of these shielded heating elements is also fastened in slots under the coil.
- The defrost heating elements are factory connected to a terminal block (MHE range only).
 230V/1 power supply for all models MHE 320E, 380E and 250C, 310C.
 400V/3 power supply for models MHE 460E, 550E, 640E, 770E and 370C, 450C, 510C, 630C.
- This slot assembly guarantees homogenous dispersion of heat over the entire coil.

Certifications

Advantages

Installation

The expansion valve may be supplied factory pre-fitted (option DM), as well as fully equipped (option EEC) to help reduce installation time (photo n°2).

Servicing / Maintenance

The MH range has been designed for easy commissioning, maintenance and cleaning. The casing is fitted with hinges offering total access to all elements of the ceiling unit cooler (coil, fan, defrost heater, connections,...).

The electric heating elements are fitted in slots under the coil offering unimpeded front access which considerably simplified maintenance.

Designation

MHE⁽¹⁾ 250⁽²⁾ C⁽³⁾

- (1) **MH** = chill temp. models without defrost
MHE = low temp. models with defrost
 (2) Model
 (3) Fin spacing: **R / E** = 4.23 mm - **L / C** = 6.35 mm

Options

Ventilation

Fan 230 V/1/60 (contact us for details).

Coil

Paint coil protection.

Glycol water, coolant (please contact us for details).

R744 optimization (please contact us for details).

Defrost

Light electric defrost

For low temperature cold storage rooms with end of defrost thermostat with single-pole, reversing switch at +12°C (±3 K) and delayed fan start up +2°C (±3 K), supplied with a sensor and fastening bracket.

Fully equipped unit coolers

Expansion valve fitted.

Fully equipped unit cooler:

- Expansion valve fitted.
- Solenoid valve fitted.
- Ball valve fitted
- Piping pre-fitted with a ball valve (siphoning function provided by the collector).
